KAOS — 12-Month Product Roadmap

This document outlines the key product development milestones for the 12 months following our Seed funding round.

Q2 2026: Foundation & Self-Serve Launch

- **[Theme]** Launch the core KAOS OS platform and validate initial self-serve adoption.
- **[Features]**
  - **KAOS OS (V1):** Public launch of our self-serve, multi-tenant SaaS platform.
  - **Core Workflow Engine:** Robust, scalable engine for orchestrating complex workflows.
  - **Initial Integrations (20+):** Connectors for key systems like Slack, Gmail, HubSpot, Xero, and Jira.
  - **Developer-First Experience:** Comprehensive API documentation and a user-friendly workflow builder.

Q3 2026: Enterprise Readiness

- **[Theme]** Build out the core features required to land and serve our first enterprise customers.
- **[Features]**
  - **Enterprise-Grade Security:** Single Sign-On (SSO) with SAML, Role-Based Access Control (RBAC).
  - **Advanced Governance:** Granular audit logs, version control for workflows, and approval workflows.
  - **Integration Expansion (50+):** Add connectors for enterprise systems like Salesforce, Workday, and SAP.
  - **Stargate AI V1:** Launch our first set of proprietary AI agents for common tasks (e.g., data extraction, summarization).

Q4 2026: Scale & Intelligence

- **[Theme]** Enhance the platform with intelligent features and prepare for international scale.
- **[Features]**
  - **SOC 2 Compliance:** Achieve SOC 2 Type 1 certification to meet enterprise security requirements.
  - **Internationalization (i18n):** Full support for multiple languages and currencies.
  - **Workflow Analytics:** Dashboards and reporting to provide insights into workflow performance and ROI.
  - **Predictive Orchestration:** An AI-powered feature that suggests workflow improvements and automations.

Q1 2027: Ecosystem & Marketplace

- **[Theme]** Open up the platform to create a thriving ecosystem of third-party developers and partners.
- **[Features]**
  - **KAOS Marketplace:** A public marketplace for third-party developers to publish and monetize their own integrations and AI agents.
  - **Partner Program:** Launch a formal channel partner program to accelerate enterprise adoption.
  - **SDK for Custom Agents:** A public software development kit (SDK) for building custom AI agents on the KAOS platform.
